DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the top drive must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 13-19 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Willis (5,036,927).

Willis discloses (see Fig. 1) an apparatus for facilitating making of a connection between an upper tubular and a lower tubular, comprising a top drive (12) having a tubular engagement tool (30,50); and a suspension unit (14,28) operatively connected to the top drive, the suspension unit configured for compensating the tubular engagement tool in order to compensate for movement of the upper tubular (col. 2, lines 48-55).

Referring to claim 14, Willis discloses the suspension unit (14,28) includes at least one piston and cylinder (28) to raise and lower the upper tubular.

Referring to claim 17, Willis discloses suspension unit (14,28) enables movement of the upper tubular in an axial direction with respect to the tubular to compensate for movement of the upper tubular.

Referring to claim 18, Willis disclose the suspension unit comprises spherical bearings (66).

Referring to claim 19, Willis discloses a mud pipe (22) for delivering mud to the tubulars.

Referring to claim 30, Willis discloses the engagement tool includes at least one gripping element (50).

Allowable Subject Matter

4. Claims 21-29 are allowed.

Response to Arguments

5. Applicant's arguments filed 1/24/05 have been fully considered but they are not persuasive. Referring to argument concerning Willis reference, the Applicant does not recite in the claims that the suspension unit moves the tubular only that it is configured for compensating the tubular engagement tool in order to compensate for movement of the upper tubular and the suspension unit disclosed by Willis is configured for compensating the tubular engagement tool (col. 2, lines 48-55).

6. Applicant's arguments with respect to claim 18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
